A MESSAGE FROM OUR CEO

Dear colleagues and partners in renal care,

NephroCan is proud to be the first and only Canadian company to provide a comprehensive portfolio of hemodialysis products — from machines and reverse osmosis systems to dialyzers, and bloodlines — and everything we do comes back to the patient.

We recognize the complexity of dialysis care and the dedication it demands from every healthcare professional. That's why our products are designed with a focus on treatment quality, ease of use, and long-term reliability, because even small improvements can have a meaningful impact on outcomes.

As part of our ongoing commitment to innovation, we are currently developing the NephroHDX™: a next-generation dialysis machine created to improve the treatment experience, particularly for patients receiving care at home. We look forward to sharing more with you very soon!

I invite you to explore our full product range and discover how NephroCan can support your efforts in advancing renal care. Let's rethink hemodialysis, together.

With appreciation,

DELARAM HAJIPOUR

Chief Executive Officer

CANADIAN LEADER IN HEMODIALYSIS

As a trusted Canadian provider, we are committed to delivering high-quality hemodialysis consumables, machinery, and equipment worldwide. Our goal is to ensure that our offerings are accessible and enhance patient care. We are dedicated to pioneering innovative therapies that revolutionize renal therapy, improving outcomes and enhancing the quality of life for patients globally.

CONSUMABLES

Nephro Filter™

Single-use hemodialyzer filters in polysulfone and polyethersulfone, NephroCan's high- and low-flux filters (1.0m²–2.0m²) are compatible with all standard machines. Sterilization methods include Gamma Irradiation (R) or Ethylene Oxide Gas (ETO).

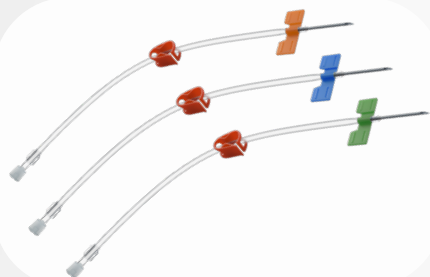

Nephro Cart™

Designed for universal on-line preparation of liquid bicarbonate, ensuring safe and effective hemodialysis. Equipped with external caps for added protection and hygienic disposal post treatment.

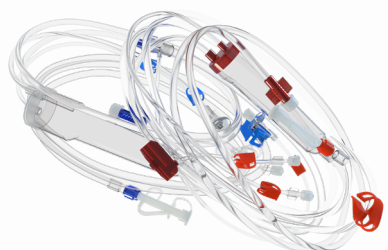

Nephro Bag™

Created for on-line preparation of liquid bicarbonate with select machines, ensuring safe and effective hemodialysis. The unique design expands access for patients globally.

Nephro Needle™

Crafted for patient comfort, NephroCan's needles ensure precise, gentle, and secure vascular access, prioritizing quality, safety, and infection prevention.

Nephro Line™

Versatile bloodlines, compatible with all machines and designed for optimal clinical performance, patient treatment flexibility, and ease of use for medical professionals.

MACHINERY & EQUIPMENT

Nephro CRO™

With its modern and mobile design, this modular central reverse osmosis machine is capable of increasing purified water capacity onsite.

Nephro PRO™

This mobile reverse osmosis machine is ideal for use in healthcare facilities such as dialysis centres, ICUs, CCUs, and emergency departments.

Nephro HDM™

Hemodialysis machine for kidney replacement therapy, featuring a single pump to support conventional hemodialysis treatments.

Nephro HDF™

Hemodialysis machine for kidney replacement therapy, equipped with dual or triple pumps for advanced hemodiafiltration.

CE certification is in progress.

Nephro Chair™

Engineered for exceptional patient comfort, this fully customizable chair is tailored specifically for hemodialysis treatments.

Nephro HDX™

A portable hemodialysis machine designed for turnkey solution convenience, ideal for small centres and home dialysis.

CE certification is in progress.
